AI & DATA SCIENCE

- Python
- Pandas
- NumPy
- Matplotlib
- Seaborn
- Scikit-learn
- Data Cleaning
- Feature Engineering
- Data Visualization
- Machine Learning
- Model Evaluation
- NLP Fundamental
- Prompt Engineering

AI TRAINING COMPETENCIES

- Data Annotation Concepts
- Data Quality Assessment
- Prompt Engineering
- AI Response Evaluation
- Research and Fact-Checking
- Model Output Validation
- Analytical Reasoning
- Technical Writing
- AI Safety Awareness
- Instruction Following

BISOLA SODIKAT ALAYANDE

AI Engineering Student | Machine Learning & Data Analyst

Hello, my name is Bisola Alayande, a second-year Artificial Intelligence Engineering student at Near East University with a passion for AI, machine learning, and problem-solving.

Through coursework and personal learning, I have developed experience in data analysis, Python, and machine learning while regularly using AI tools to research, evaluate outputs, and deepen my understanding of complex topics. I enjoy building projects, exploring datasets, and applying machine learning techniques to gain practical experience and continuously improve my skills.

I am naturally curious, detail-oriented, patient, and adaptable. I enjoy understanding not only how systems work but also why they work that way and how they can be improved. I actively seek feedback, ask questions, and explore different approaches to problem-solving in order to learn and grow.

My goal is to gain hands-on experience with real-world AI applications and contribute to the development of reliable and effective AI solutions.

EDUCATIONAL BACKGROUND

Currently: Near East University - B.Sc. in Artificial Intelligence Engineering

Focused on problem-solving, systems design, and project collaboration.

Transferred from: Amity University – B.Sc. in IT Software Engineering

Built a strong foundation in programming (Java, C++, Python), database management (MySQL), and Microsoft Office Suite.

EXPERIENCE

Software Engineer Intern - Sanlam Allianz (Mauritius Branch)

- Managed and validated client datasets to maintain data integrity.
- Developed a Premium Calculator tool that automated manual computations and improved efficiency.
- Generated reports and supported data-driven operational processes.
- Collaborated with teams to streamline business workflows.

Software Engineer Intern - Near East University

- Built administrative dashboards for data management and reporting.
- Assisted in software testing, debugging, and documentation activities.
- Collaborated in designing and delivering web-based solutions.

AI TOOLS

- ChatGPT
- Microsoft CoPilot
- Gemini
- Kiro
- Prompt Design
- Result Evaluation

PROGRAMMING & WEB DEVELOPMENT

- JavaScript
- TypeScript
- Python
- React & Next.JS
- NodeJS
- Git & GitHub

SOFT SKILL

- Problem-Solving & Creativity
- Communication & Teaching Skills
- Leadership & Team Coordination
- Collaboration & Teamwork
- Adaptability & Fast Learning
- Empathy & Community Orientation

DATABASE

- MySQL
- Prisma
- Docker
- VS Code
- Postman
- MS Office
- Google Workspace

RELEVANT COURSEWORK

- Machine Learning
- Artificial Intelligence
- Data Structures & Algorithms
- Database Systems
- Software Engineering
- Linear Algebra
- Calculus
- Neural Computation

LEADERSHIP & COMMUNITY INVOLVEMENT

Admin & Team Leader – DevByte Community (Africa)

- Organized mentorship programs, workshops, and community events.
- Coordinated communications with mentors and participants.

Volunteer Tutor – Free Hype Lessons (Nigeria)

- Tutored students in Mathematics and Science.
- Maintained lesson schedules and tracked student progress.

Co-Founder – She Builds Tech(Nigeria)

- Organized mentorship programs, workshops, and community events.
- Coordinated communications with mentors and participants.

AI & DATA SCIENCE PROJECTS

Scorevision — Student Performance Dashboard

- Designed a data pipeline using Python, Pandas, and NumPy to clean and process educational datasets.
- Conducted exploratory data analysis and feature engineering to identify performance trends.
- Built interactive visualizations using Matplotlib and Seaborn.
- Integrated analytical insights into a React-based dashboard for reporting and decision support.

Data Cleaning & Predictive Analytics Project

- Cleaned and pre-processed raw datasets by handling missing values, duplicates, inconsistent formats, and outliers.
- Performed feature selection and feature engineering to improve model performance.
- Built and evaluated machine learning models for predictive analysis.
- Utilized Python, Pandas, NumPy, and Scikit-learn for data preparation and model development.
- Assessed model performance using appropriate evaluation metrics.

LEARNING & DEVELOPMENT

Currently Learning	Future Learning Goals
Data Science	Pytorch & Deep Learning
Data Structures & Algorithms	Natural Language Processing (NLP)
Machine Learning	LangChain & AI Agent Development
Neural Networks	Large Language Models (LLMs)
